

BBC Streaming in Sweden

Use a VPN to access BBC content in Sweden.

1

Choose a VPN

Select a reliable VPN service that offers fast speeds, strong security features, and servers in the UK. Make sure the VPN is capable of bypassing the BBC's geo-restrictions and has a good track record with streaming services.

Download and install the VPN software on your device. Ensure it's compatible with the device you intend to use for watching the BBC, such as a smartphone, tablet, laptop, or smart TV.

2

Install VPN

3

Connect to UK

Open the VPN application and connect to a server located in the UK. This will assign you a UK IP address, which tricks the BBC iPlayer into thinking you are accessing it from within the UK.

Create a BBC iPlayer account if you don't already have one. You'll need to provide a valid UK postal code, which can be obtained by doing a quick online search.

4

Sign Up/Register

5

Start Streaming

Navigate to the BBC iPlayer website or app with your VPN active and log in using your account. You should now have access to the full range of BBC programming as if you were in the UK.
